

Detailed data sheet: WOW Expense reports

WOW Expense reports is a web app dedicated to compiling and **managing your staff's expense reports**. This software is provided in SaaS service and is especially suitable for companies with a large number of agents travelling world-wide. It's easy and adaptive, and thanks to its modularity, it can be useful to smaller companies too, meeting their needs to handle staff's expense reports efficiently and avoiding waste of time.

Features:

- Web solution available as service in cloud;
- Available on every device;
- Multi-language;
- Multi-company;
- Management and confirmation of data and actions in real time, including expenses' approval;
- Input and collection directly into the expenditure systems.

Advantages

- Simplifies and eases the processing of expense reports;
- Integrates with the informative systems of your business;
- Reduces paper and risk of error.

Technical requirements

- Developed in Java EE and JSF (an advanced tool for the development of web apps);
- Supported browsers (minimum version required): Explorer 7, Mozilla Firefox 2, Apple Safari 3;
- Compatible with different OS (Windows, Unix, Linux, OS/400, ...).
